

size\_t

```
graph BT; uv_udp_s[uv_udp_s] -.->|send_queue_count, send_queue_size| size_t[size_t];
```

The diagram illustrates a pointer relationship. At the bottom, a gray rectangular box labeled 'uv\_udp\_s' has a dashed purple line extending upwards. This line terminates in a solid purple arrowhead pointing to a white rectangular box labeled 'size\_t' at the top. To the right of the dashed line, the text 'send\_queue\_count' and 'send\_queue\_size' is written, indicating the specific fields within 'uv\_udp\_s' that point to the 'size\_t' variable.
