

cocos2d::experimental
::IAudioPlayer

```
graph BT; A[cocos2d::experimental::UrlAudioPlayer] --> B[cocos2d::experimental::IAudioPlayer];
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray-shaded box representing the base class, `cocos2d::experimental::UrlAudioPlayer`. At the top is a white box representing the derived class, `cocos2d::experimental::IAudioPlayer`. Two blue arrows originate from the top of the base class box and point upwards to the bottom of the derived class box, indicating that `UrlAudioPlayer` inherits from `IAudioPlayer`.
