

btCollisionAlgorithmCreateFunc

```
graph BT; A[btSphereTriangleCollisionAlgorithm::CreateFunc] --> B[btCollisionAlgorithmCreateFunc];
```

The diagram illustrates a relationship between two function pointers. At the bottom, a gray-shaded box contains the text 'btSphereTriangleCollisionAlgorithm::CreateFunc'. Two blue arrows originate from the top of this box and point upwards to the bottom of a white box at the top, which contains the text 'btCollisionAlgorithmCreateFunc'. This indicates that the function in the gray box is a specialization or override of the function in the white box.
