

btCollisionAlgorithmCreateFunc

```
graph BT; A[btBoxBoxCollisionAlgorithm::CreateFunc] --> B[btCollisionAlgorithmCreateFunc];
```

The diagram illustrates a relationship between two function pointers. At the bottom, a light gray rectangular box contains the text 'btBoxBoxCollisionAlgorithm::CreateFunc'. Two dark blue arrows originate from the top edge of this box and point upwards towards the bottom edge of a white rectangular box at the top. This white box contains the text 'btCollisionAlgorithmCreateFunc'. This visualizes that 'btBoxBoxCollisionAlgorithm::CreateFunc' is a specialization or override of the base function 'btCollisionAlgorithmCreateFunc'.
