

cocos2d::experimental
::AudioDecoder

```
graph BT; A[cocos2d::experimental::AudioDecoderSLES] --> B[cocos2d::experimental::AudioDecoder];
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray-shaded box representing the base class, `cocos2d::experimental::AudioDecoderSLES`. A blue arrow points vertically upwards from this box to a white box at the top, which represents the derived class, `cocos2d::experimental::AudioDecoder`. Both boxes have a black border and contain their respective class names in two lines.

cocos2d::experimental
::AudioDecoderSLES
