

FalseType

```
graph BT; A["internal::IsGenericValueImpl< T, Encoding, Allocator >"] --> B[FalseType];
```

The diagram illustrates a class hierarchy. At the bottom is a gray box containing the text `internal::IsGenericValueImpl< T, Encoding, Allocator >`. Two blue arrows originate from the top of this box and point upwards to a white box at the top containing the text `FalseType`. This indicates that `internal::IsGenericValueImpl` inherits from `FalseType`.

`internal::IsGenericValue  
Impl< T, Encoding, Allocator >`
