

```
std::iterator< std  
::output_iterator_tag, T >
```

The diagram illustrates an inheritance relationship. A light gray box at the top contains the C++ type `std::iterator< std::output_iterator_tag, T >`. Below it, a darker gray box contains the type `google::protobuf::internal::RepeatedPtrFieldBackInsertIterator< T >`. Two blue arrows point upwards from the bottom box to the top box, indicating that the bottom type inherits from or is a specialization of the top type.

```
google::protobuf::internal  
::RepeatedPtrFieldBackInsertIterator< T >
```
