

true_type

google::protobuf::internal
::is_integral< wchar_t >

```
graph BT; A[google::protobuf::internal::is_integral< wchar_t >] --> B[true_type]; A --> B;
```

The diagram illustrates a relationship between two C++ types. At the bottom, a gray-shaded box contains the text 'google::protobuf::internal::is_integral< wchar_t >'. Two blue arrows originate from the top of this box and point upwards to a white box at the top containing the text 'true_type'. This visualizes that 'true_type' is a specialization or inherits from the 'is_integral' trait for 'wchar_t'.
