

cocos2d::experimental
::AudioResampler

```
graph BT; A[cocos2d::experimental::AudioResamplerCubic] --> B[cocos2d::experimental::AudioResampler];
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray box representing the base class, `cocos2d::experimental::AudioResamplerCubic`. At the top is a white box representing the derived class, `cocos2d::experimental::AudioResampler`. Two blue arrows point upwards from the base class box to the derived class box, indicating that `AudioResampler` inherits from `AudioResamplerCubic`.
