

btCollisionAlgorithmCreateFunc

```
graph BT; A[btGImpactCollisionAlgorithm::CreateFunc] --> B[btCollisionAlgorithmCreateFunc];
```

The diagram illustrates a relationship between two function pointers. At the bottom, a light gray rectangular box contains the text 'btGImpactCollisionAlgorithm::CreateFunc'. Two blue arrows originate from the top edge of this box and point upwards to the bottom edge of a white rectangular box at the top, which contains the text 'btCollisionAlgorithmCreateFunc'. This visualizes that the 'btGImpactCollisionAlgorithm::CreateFunc' function pointer is derived from or inherits from the 'btCollisionAlgorithmCreateFunc' base function pointer.
